Education

University of Colorado Boulder

August 2020 – May 2025

Bachelor of Arts in Computer Science

- Minor in Philosophy
- Dean's List 2023, 2024
- Software Development, Computer Systems, Object-Oriented Programming, Algorithms, ...

Work Experience

INVENTRACK

January 2020 – Present

Founder and President

Live Site: <https://inventrack.org> **Architecture Overview:** <https://inventrack.org/about.html>

- Developed a SaaS product that monitors inventory on major e-commerce platforms including Target, eBay, and Walmart utilizing Python (Requests, Beautiful Soup), sending **20,000+ requests per hour**.
- Deployed and maintained a Linux using CentOS and Microsoft Azure to host with **99%+ uptime**.
- Implemented webhook integration using Discord's Webhook API to provide real-time server notifications to allow for scaled implementation, leading to a partnership and licensing agreement.
- Licensed to a for-profit Discord server with **3000+ paying members**, generating **\$1.2M+ in gross revenue** and **\$24,000+ in affiliate commissions** on eBay in three months, recorded on eBay's Partner Network Dashboard.

Projects

EVENT-EDU

October 2023 – December 2023

Full Stack Developer

- Created a social media website where college students can join communities of interest, discover events happening nearby, and form online friendships by collaborating with a team of 4 students.
- Developed, maintained version control, and hosted the platform online by utilizing Git, Microsoft Azure, NodeJS, JavaScript, HTML, CSS, EJS, and PostgreSQL.

NFL BIG DATA BOWL - Kaggle.com Competition

September 2023 – December 2023

Developer and Data Analyst

- Created a machine learning model that predicts NFL play types (run, pass, punt) based on historical actions from 50,000+ entry datasets. Utilized Python (Pandas, NumPy, Scikit) and Jupyter to develop, train, and analyze the model, delivering 90%+ accuracy.

Leadership Experience

Phi Gamma Delta

November 2021 – November 2023

Judicial Board Chairman / Head of Risk Management

- Developed and implemented risk management policies, conducted safety audits, trained members on risk awareness, communicated with emergency service officials, and ensured compliance with university and fraternity regulations.
- Responsible for the safety and good standing of an organization with 140+ active members and a national presence with 200,000+ lifetime members.

Relevant Skills

- Python, C, C++, x86-64 Assembly, Java, JavaScript, SQL, MongoDB, HTML, CSS, EJS, Scala
- Git Version Control, Docker Containerization, Linux Kernel, Server Management, Data Analysis, Vim
